Arbitrary Restrictions Removed

Washington, Nov. 13.-The Bureau of American Republics received notice of a decree recently issued by the President of Mexico, removing many arbitrary restrictions at the Custom House in the City of Mexico. The decree provided that foreign merchandise paying duty on entering the country at the frontier or maritime Custom Houses shall not be subject to further taxation beyond a five per cent, consumption tax, to be calculated on the amount of imported duties on its being introduced into the general district. Foreign goods on the free list shall not pay anything on entering the

Berlin Banker Gone Wrong.

BERLIN, Nov. 13 -A report is current that the head banker of a banking firm of Charlottesburg, a suberb of Berlin, has confessed the misappropriation of securities.

Later in the day it transpired that

the story was absolutely true. The Charlottesberg banker who robbed his customers was named Mass. The liabiliies are estimated at 1,750,000 marks. Mass appeared at the central police station in Berlin this morning and delivered himself to the authorities there, after confessing his wrong doings.

Conspiracy in Russia.

Berlin, Nov. 13 .- A wide conspiracy to create a representative assembly has been discovered in Russia, with Moscow as the center. Advices from St. Petersburg state that the authorities there are becoming more and more suspicious, as the internal situation of the Empire continues to grow more critical. There is considerable uneasiness regarding the status of affairs throughout the Empire, and as a result of this feeling the marshals power, and the residents of the different parts of the country have been warned that they will be held responsible for any manifestation of any political feeling against the govment which may occur in the provinces or local administrations under their control.

By Cable and Associated Press. London, Nov. 13 .- A Santiago correspondent of the Times says: Further advices have been received from Rio Grande Do Sul, to the effect that the garrisons at San Gabriel and Page have also revolted against the Dictatrship. A later telegram says that in Rio Grande Do Sul the opposition to Fonseca is triumphing almost wholly throughout the province, without serions fighting.

Paris, Nov. 13 .- An official telegram was received in this city to-day from Rio Janeiro regarding the Brazilian diplomatic service and the condition of the finances of the country. The dispatch stated that all legations hitherto established in the various European and other countries will be maintained. Relative to the financial sitpatch says all the conditions are extremely satisfactory to the authorities.

Maligned Nevada.

Under the caption of "Maligned Nevada," the San Francisco Re-port publishes an interesting bit Not a bit of it. The South at Pacific of history about the Southern Pa-cific Company's attitude towards of Nevada many in less away from every mining district and large cattle this State. While the Report does range. not tell anything but what has been published in the GAZETTE time and again during the past three years, we republish the article in part to show the Report's apparent friendliness towards this State. None of the other city papers have contained a line but of abuse of this State and its people for the past ten years, and now that the Report is taking up the cudgel in our defense, it is worthy the support and confidence of our people and those who subscribe The for a San Francisco daily should take the Report above all other city papers. "The gods he'p those who help themselves." The Report says:

One of the objects of the Traffic Acsociation that should not be lost of is to encourage the incoming of competing railway. If the merchants shall encourage one of the roads now in Utah to come directly west to San Francisco, they will be aided by the citizens of Nevada. Gentlemen who have traveled all over that State, and who possess a wide and intimate acquaintance with its citizens, say the State of Nevada will do anything legitimate to kill the monopoly exercised by the Southern Pacific Com-pany. California suffers enough, every one knows, but Nevada is abso-lutely helpless. California has rivers. bays and a long seahoard. Nevada has not. So while the one-railway State of California, when properly or-ganized can make itself heard, Nevada can do nothing without another railway. It must have a competing

road and that quickly.

Nevada is being ridden to death by monopoly. The Southern Pacific Company's attatude towards that State is inexcusable. Instead of advertising its natural advantages and developing its resources, the whole effort of the Southern Pacific Company seems to be to retard the development of the State in every way possible, Huntington, Stanford and of course C F. Crocker never refer to the rail-road line across the State of Nevada except as "the bridge." They delight in ridicaling the State and its inhabitants, and are loud in declaring that there is no business for a railway anywhere in that country. They frequently refer to the State in public speeches and in interviews as a place producing nothing but "sage-brush and sand," and in speaking thus they grin unctuously as if they had said something hugely humorous. Nothing is more common than to hear them talk about Nevada as the "des

cific has of depreciating Nevada is noted frequently at Reno. The train passing through Reno for San Francisco puts no extra s'eeping coaches on at that point, although all the pas sengers to San Francisco from Virginia City, Carson and the rich agricultural valleys of Nevada gather to-gether at Reno. Usually the sleeping coaches are filled at Ogden and consenently there is no accommodation to be had for the passengers who board the train at Reno. They have to take the day coaches and sit up all night. Overland passengers frequently ask why, if there is such a crowd at Reno, more sleeping coaches are not provided, and here the Southern Pacific's Groceries, Tropical Fruits, opportunity comes. Its employes tell the inquirer that "this is an unusual crowd. Usualty there are only one or two people here." The employe usually adds: "Only one or two people in Nevada," you know, and thinks it a good joke. It is part of

All this studied depreciation of Nev-All this studied depreciation of Nevada has a motive, and the motive is
not far to seek. It seems strange, indeed, that the Nevada citizens have
not fathomed it long ago. It is simply
this: If the Southern Pacific
Company can persuade passengers
crossing Nevada, including all railway
men that Navada is a State without men, that Nevada is a State without resources it will deter a competing road from building into the State. That is the long and short of it. That That is the long and short of it. That is why the grounds around the rail-way part of Reno are not made stractive, although the Reno country is one of the finest agricultural localities on the coast. That, too, is why, instead of putting up a decent hotel at Reno alter the fire, the company allowed a finnsy one-story brick arrangement to be erected. In short, the Southern Pacific Company will never do anything for Nevada to help build up the State.

When the railway people speak of "the bridge," they mean that the income from local traffic on the line across Nevada is no more than it would be if the line crossed over the State on a bridge. This is a bare-faced Talsehood to start with, for the local traffic of Nevada on the Central Pacifical line containty pays expenses. fic line certainly pays expenses. Through some hundred miles the line runs through what is not an attractive runs through what is not an attractive country, to be sure, but the Southern Pacific line through the San Joaquin valley, in California, runs over long attractives of country that to the eye are equally mattractive. But the country properly speaking, is not a desert. On the country, as some of the richest wheat lands in California are in that very San Josquin valley, so along the line of the Central Pacific in Nevada, north and south of the

Humboldt river, are some of the finest grazing lands on the coast. The cattlemen, however, do not like the Southern Pacific's methods or its rates, and they drive their herds over a range two hundred miles broad to Pocatello, on the Union Pacific rather than on the Union Pacific, rather than paironize the Nevada and California

In laying out the Central Pacific In laying out the Central Pacific rallway a number of surveys were made. There is a broad stretch of unproductive country directly west of the Great Salt lake that has to be crossed. The Southern Pacific's road runs around the north of the lake. It could save in grade, and save ninety-four miles in length of road if the road ever run from Salt Lake City south of the lake and the need use west to Halleck. Instead of that the company keeps the passengers fourteen hours

Halleck. Instead of that the company keeps the passengers fourteen hours longer than necessary going across the Salt Lake desert. Then when they enter Nevada they are tired and not prepared to give Nevada a fair chance. That is another way the Southern Pacific Company compains that there is no local traffic in Nevada. Assuming this to be true (although it is a faise-shood) whom can the company blame but itself? Assuming that Nevada has nothing to ship but the stock and ores, what has the Southern Pacific Company done to reach those products? Not a thing.

Such is to be the engage- time in the last ment of Goodyear, Elitch & Schillings Minstrels, the company has created a sensation in the minstrel world. This is only the second year it has been before the public, yet it has sprung to the front rank of the leading minstrel companies travelling, presenting the greatest galaxy of minstrel stars that ever was known to have traveled with one company at one time. Charles W. Goodyear belongs to the old school of minstrelsy and has been a leading light in the minstrel profession for years. He has appeared in every city

years. He has appeared in every city in the United States and Canada. Charles E. Schilling has been conperted with the best minstrel and pantomine companies travelling. He is considered the greatest producer of original ideas in minstrelsy in the country. He is the originator of instrumental comedy and has hopestly strumental comedy, and has honestly earned the title of premier musical artist of the world. E. M. Hall is the greatest delipeator of the Southern egro character and draws the largest former. ABOUT BEANS.

the Carload from California. As a GAZETTE reporter was passing W. O. H. Martin's store this morning

he noticed a lot of drays in front uploading a lot of something in sacks, and when he inquired of Mr. Martin as to what they contained, was surpriseed to hear that they were beans, pure and simple, of the small white

"Beans?" inquired the reporter to make sure that he had heard aright. "Yes, beans from California," re plied Mr. Martin. "Great Scott! You don't mean to

tell me that you are sending abroad for your beans, do you?' "That's what I said," replied the

nerchant. "Why, can't you buy what beans your trade calls for at home?"

"No; none has ever been offered here for sale by any of our ranchers." The reporter walked on, wondering what other articles of food we brought in from a distance that could better be produced at home. There are chickns, turkeys, ducks, ham, bacon, salt pork, beans, eggs and nearly every-thing else that Nevada can produce brought in here every day. Is it a wonder that times are hard?

KISSERS OF CANINES. What Sensible People Think of Their Re-

A scientist has discovered a new disease which he calls by the name of echinoocecus, and which he says is "bred in man by the kiss of a dog."
This is a blunder, writes the Woman About Town, in the New York Evening Sun. Men are not in the habit of let-ting dogs kiss them. Nor are women. But there is a certain hybrid creature that is given to it. This creature has the appearance of a woman without one of the healthy instincts of her sex. Inevery year," said the fat umbrella man to a New York Recorder reporter as the stead of a baby she cuddles a frowsy, fat, wheezing, vicious dog, and instead of the kisses of a child's sweet, wholesome amount must run so far up in the thousands it would seem an exaggeramouth she coaxes for the kisses of this tion to one who didn't know anything nasty little beast. The point is that no fastidious right-minded woman would want to kiss a dog any more than she would want to kiss a cator a rat or a chicken. There is a sense of sanctity in herself that makes the true woman. In the case of this young girl she probably thought piquing the young fellow with a care-less display of endearment in which he had no share. A Severe Law.

The English peo / ple look more closely to the genu nene of these staples than of these staples than we do. In fact, they have a law under which they make seizures and destroy adulterated products that are stroy adulterated products that are

not what they are represented to be. Under this statute thousands of pounds of tea have

Tea, by the way, is one of the most notors ously adulterated articles of commerce. Not alone are the bright, shiny green tens artificially colored, but thousands of pounds of substitutes for tea leaves are used to swell the bulk of cheap teas; ash, sloe, and willow leaves being those most commonly used. Again, sweepings from tea warehouses are colored and sold as tea. Even exhausted tea leaves gathered from the tea-houses are kept, dried, and made over and find their way into the cheap teas.

The English government attempts to stamp this out by confiscation; but no tea is to poor for us, and the result is, that probably

the poorest teasused by any nation are those consumed in America.

Beech's Tea is presented with the guar-anty that it is nucolored and unadulterated; in fact, the sun-cured tea leaf pure and siman infusion than of the artificial teas, and its fragrance and exquisite flavor is at once apparent. It will be a revelation to you. In anteed, it is sold only in pound packages bearing this trade-mark:

Tobacco is man's most

But lew people know that there is such a thing as sun-cured tea in existence, and lewer have seen it. But there is, and it is of all teas the sweetest, purest, and most fragrant. You ask at once how it is that it is not offered for sale and that you know nothing of it. That is answered easily; but it is necessary to present first a few details. The public only knows

Few people t now that the bright blutsh green color of the ordinary teas exposed in the windows is not the natural color. Unplea ant as the fast may be, it is nevertheless artificial; Prussian blue, silica, gypsum, plumbag, and other unbealthful mineral col is being used for this purpose Theeffect is twofold It usefully a ages the tea a bright, shiny, a tractive green, but also permits the use of "off-color" and worthless tens, which once under the green cloak, are readily worked off and good quality of tea. Theaboninable coloring practice even admits of the use of foreign substances, and the English government, which looks closer into the gen ulneness of its a sples than ours, has in some of the alleged "fi est" of teas found redried eaves, straw, fragments of matting, rice husks, and willow leaves. In fact, it is openly stated by an English authority that hu of thousand. That it is, therefore, sweeter and far more fragrant than the artificially colured green ceas and the manipulated basket or pan-fired teas, you hardly need be told. The it is more healthful than the mi eas, is also apparent. That it is more expen sive, is also true; and that is another reason you have never seen it. There is not so much profit in it as there is in the cheap adulter

According to the custom-house reports, the amount of tea received at San Francisco last year (1890) was 6,840,137 pounds, and the value \$956,290, or a fraction over 18c per round The consumer, of which the reader was one. paid for that 10c tea all the way from 10c t 11 per pound. In other words, for that \$156,256 worth of tea the consumer paid between four and five millions of dollars. There are you enormous profits, and there you will probably find the chief reason why most of you never have no mask, they are compelled to be abso lutely pure and of better quality than the artificially colored and manipulated teas Hence the margins on them are smaller, and my dealers don't care about haudiing the and you know rothing about them. But it is the object of this article to teil you where yo can get them, and what to ask for, and all

about them. "Beech's Tea."

"Beech's Tea," gua anteed to be the pure

sun-cured leaves, is now offered to the people of the Pacific Coast. It will be a revelation to you. You doubtless never saw any nat ural leaf. Have your grocer break open a package. It will be found in color to be just between the ar-incially colored green and the black teas, and the drags tea presents a clear, brilliant canary color, of delightful fragrance. It is offered to the people at 60e per pound, the same price that many artificially colored teas are sold for. But its guarinteed purity makes it more econ use; for a less quantity, say about twenty grains, is required per cup. As there are 7,680 grains to a pound, there will be seen to be between three and jour hundred cups to the pound, or at the rate of about one fifth of a cent per cup. Its economy is therefore manifest. It is put up in one-pound packages only, in patent air-tight and mo'sture-proof parchment, with the trade mark that is found at the bottom of this article p'ainly printed on the package. It is sold in this form for stone is that the original strength and aroma is preserved; and second, the can be no deception, which would be quite possible if it were sold in bulk, without the name and trade-mark attached. Caution.
